   Uchtepa district, Tashkent city, Uzbekistan • Oct 2019 – Aug 2021

Tasks Performed:
- Designed, developed, tested and deployed scalable full-stack enterprise projects in agile teams of 5.
- Performed product presentations at demo meetings with customers, leading to numerous sales.
- Performed code reviews and optimizations for existing projects.
- Worked with a team of developers to create an e-commerce website using React.JS and Node.JS for backend processing.
- Created reusable components that were easily maintainable, tested, and documented for future development teams.
- Collaborated with designers on UI/UX design specifications before beginning development work.

UI Components Designed & Application Interface coding
- Identified web-based user interactions and developed highly responsive user interface components via React concepts.
- Translated designs & wireframes into high-quality code and wrote application interface code via JavaScript following React.JS workflows.

Code Debugging & Front-end Architecture
- Troubleshot interface software and debugged application codes to improve functionality and performance by 50%
- Developed and implemented front-end architecture to support user interface concepts with 100% accuracy.
- Used Redux to store data globally and for easy retrieval of data to any component in the app.
- Tested REST endpoints using POSTMAN.
- Maximized use of Events and promises in ES6 and React for application control flow.
- Designed websites, portals and large-scale web applications for multiple clients.
